SUMMARY

Passionate cybersecurity engineer and B.Tech Computer Science student with a strong foundation in full-stack web development and database engineering using Python and MySQL. Actively exploring threat hunting, cloud security, and defensive system architecture to build secure, resilient software.

EDUCATION

Chhatrapati Shivaji Institute of Technology, Durg, CG 5th Semester (Currently Pursuing)

Bachelor of Technology (B.Tech) in Computer Science

Nirmala English Medium Ser. Sec. School Dalli Rajhara

TECHNICAL SKILLS

Languages: Python, Java, PHP, Dart

Web & App Development: Web Development, Flutter (cross-platform app development with Dart)

Database: MySQL (relational database design, queries, and data management)

Libraries: Python Libraries (data handling and application development)

Security Focus: Threat Hunting, Cloud Security, Defensive System Architecture

Core Competencies: Full-Stack Development, Database Engineering, Problem Solving

TECHNICAL PROJECTS

ShelfWise - Intelligent Library Management System Python, MySQL

- Developed an intelligent library management system to manage books, members, and lending records in one place.
- Designed the MySQL database schema and queries powering book search, issue, return, and availability tracking.
- Structured the application around clear, reusable modules to keep the system easy to extend and maintain.

insight-lens-28 Web Application

- Built a Google Lens-style web application that lets users upload a photo to identify and search for items.
- Displays detailed information about each identified item directly in the web interface.
- Enriched results by fetching additional data from the internet, giving users fuller context for every search.

convertIQ File Conversion App

- Developed a file conversion application that converts documents and images between formats, including PDF to PNG and PNG to PDF.
- Extended support to multiple other file formats, replacing the need for several separate converter tools.
- Designed a simple upload-and-convert workflow so users can get converted files in a few steps.

CERTIFICATIONS

- **ReactNext Workshop** - Hands-on workshop covering modern front-end development with React and Next.js.
- **Flutter Workshop** - Practical training in building cross-platform applications using Flutter and Dart.
- **Campus to Corporate** - Career-readiness program focused on industry expectations and professional skills.
